

OE-Organization Earth MULTIPLIER SPORT EVENT

Athens, 18th November – 22nd
November

The Multiplier Sport Event had a two-day structure, divided into Local Conference and Training Course.

On 18/11/2022, the Local Conference event took place in collaboration with sports clubs, organizations, and NGOs. Project partners, stakeholders, and sports professionals (coaches, managers, educators, and students) had the opportunity to be presented with the SIMCAS methodological approach, toolkit, and project findings. The importance of the role of sports as a tool for social purposes and related issues, as well as relevant methods that can promote inclusion and integration through sport, were introduced and discussed with the participants.

The Training course which came as a continuation of the first day and was held on 22/11/2022 provided the necessary practical approach and pilot test methodology developed during the project span, in order for the participants to understand, connect the theoretical part and experience some helpful examples of games and activities where sport can help us facilitate/ improve social inclusion and integration.

More than 40 participants took part in the events during these days and were actively engaged in the sessions, with a significant number showing interest in learning more about relevant activities/programs and how they could collaborate with our organization.
