

SUS MULTIPLIER SPORT EVENT

Rome, 12nd December 2022

Multiplier sport event was a one-day (12/12/2022) workshop for sport staff from different cities across the country.

During the event the project SIMCAS was presented, its objectives, partners, and results. The particular focus was on the explanation of the SIMCAS methodology and the SIMCAS Toolkit. Sport staff showed interest in the toolkit and they intend to use it in their sport organisations. In Slovenia there are quite a lot of second-generation migrants, in the last year also a few Ukrainians started to attend the sport activities.

The participants actively engaged in the discussion. It was emphasized that sport is a powerful tool for social inclusion and local community development.

The presented innovative methodology is useful also for regular sport programmes that already take place in local sport clubs, especially in grassroots sport. A fruitful debate developed about the funding opportunities in Slovenia that would allow hiring of multidiscipline staff.

Representatives from two municipality sport associations expressed interest to organise SIMCAS Training Course in their municipality in order to train the trainers from the local sports clubs.
